Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

1. This amendment after final action filed 3/6/2007, with respect to claims 13-24 and 30-40 are acknowledged. However, upon further consideration, new rejections are made below.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 13-16,23,24,30,32,34-40 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1-5,15-18,20-23,26-35,40,42,44-45,47-48 of copending Application No. 10/640,598. They are not patentably distinct from each other because they recite the same subject matters as following: a housing includes a hair graft chamber, a piston chamber, a rod is inside the housing, an actuator moves the end of the rod substantially flush with the open distal end of the housing. As to claims 14-24,30-40 are not patentably distinct from each other because they are essentially the same as those in the cited copending application No.10/640,598.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 13-24,30-40 are rejected under 35 U.S.C. 102(b) as being anticipated by Greco et al. (5,352,194).

Greco discloses in figure 1, a surgical device having the limitations as recited in the above listed claims, including: a housing that includes an actuator chamber 3 and a graft chamber 1 for housing a loaded hair graft or tissue, a vacuum source (not shown, see col. 7, lines 53-60) coupled to the housing to provide suction through a movable rod 6 at the open distal end for drawing a hair graft into the graft chamber, where the rod is inside the housing, and where an actuator 5 moves the end of the rod substantially so that a loaded hair graft is delivered to a scalp wound, where the vacuum source coupled to the actuator chamber, and where the actuator includes a plunger or a piston 5 connected to the rod, and where the plunger is able to move the rod, where the actuator includes a piston inside the actuator chamber, and where the device further includes a spring 11 coupled to the piston, where the spring is capable of moving the end of the rod to the first position from the second position. As to claims 17-18 and 33-34, Greco discloses in figure 1, a surgical device having the limitations of the above listed claims, and where the device further comprises a projection at best seen in fig. 1 which connected to the hair graft chamber, the projection extends in parallel to the central axis and beyond the open distal end of the housing.

Response to Arguments

Art Unit: 3734

4. Applicant's arguments filed 3/6/2007 have been considered but are moot in view of new ground(s) of rejections. Applicant is asked to please refer to the modified prior art rejections above where examiner addresses applicant's concerns regarding prior art rejection.
